PRODUCT SHOWCASE

IMPROVING EFFICIENCY & TIMELINESS OF TMF FILING

MONDAY MAY 16TH @ 11:45AM EST

Lyndsey Kirwan
eTMF Services Coordinator

Chris St Amour
Account Executive

How can TMF filing be a headache today?

- Collaboration between Sponsor and CRO is challenging
  - Not all study stakeholders follow the same structure and index
  - Documents coming from many sources
  - Documents are often stored in various systems
- Bottlenecks because of personnel issues
- Process can be very manual and arduous
- Potential for lost, missed, or misplaced documents is greater
- Difficult to track metrics, maintain oversight, and remain inspection ready
- **...and it's a pain to manage!**

Poll

How are you managing your TMF index today?

- TMF Index on paper
- TMF Index in an Excel spreadsheet
- TMF Index in an eTMF
- No index

Take TMF filing & indexing from headache 🤕 to happy place 😀

Pre-defined in-system TMF plans (index)

Auto-Placeholder Generation

Easy filing on placeholders or through Templates

Receive artifacts from sites/vendors in the Staging Area

Documents automatically route through pre-defined workflows

Demo

What we learned

- How to improve efficiency of TMF management from study start up to closure
- Set up your eTMF Plan directly in the system from a preexisting template
- Upload documents from your computer onto placeholders created automatically from your plan
- Sites can contribute documents to the TMF via email to the Staging Area without even needing access to the system!
