PRODUCT SHOWCASE

STREAMLINING AUTHOR PRODUCTIVITY WITH WORKFLOWS

WEDNESDAY MAY 18 @ 11:45AM EST

Lyndsey Kirwan
eTMF Services Coordinator

Oliver Pearce
Director, Commercialization

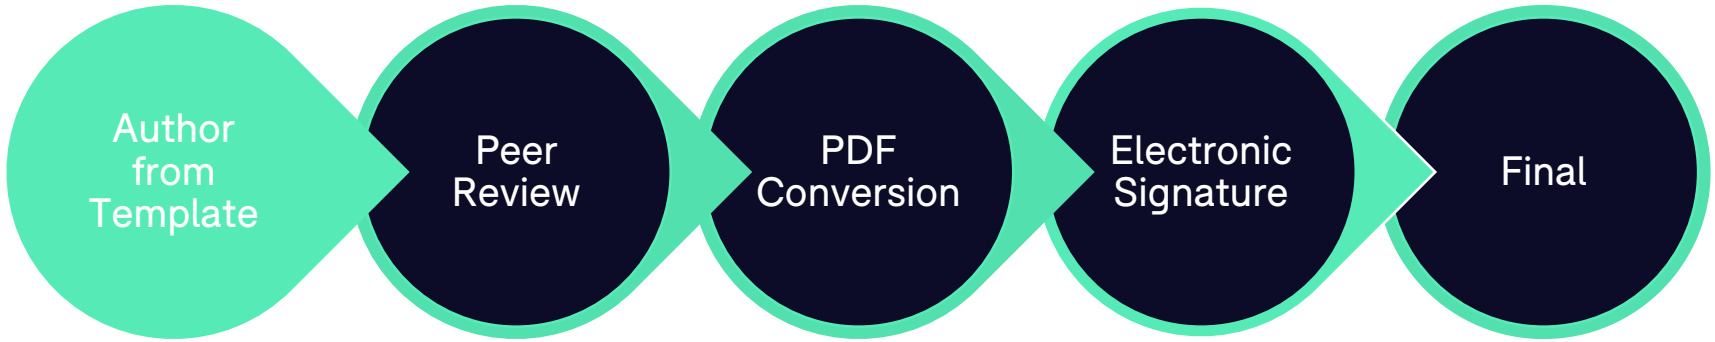
What's wrong with traditional document management?

- We lack standardization of formatting and template use
- Team members are often creating documents on their desktop or in their system of choice
- Centralizing collaboration is challenging
- Naming conventions and standard nomenclature is out of reach
- Formal reviews are not being tracked correctly and is being facilitated by email 👎
- **Don't even talk to me about audit trails….**

Active TMF Management

- Collaboration within the eTMF system
- Workflows per document type
- 2 common use cases:
  - **Active workflow:** author, review, approve
  - **Passive workflow:** QC to final

Use Case 1: Active Document Lifecycle



Use Case 2: Passive Document Lifecycle
